

# Falcon<sup>TM</sup> Transportable

## **THE TRANSPORTABLE DOCUMENT SCANNING WORKSTATION**

Falcon<sup>TM</sup> Transportable, designed for mobile scanning operations, combines OPEX's innovative one-step drop feed scanning technology with the performance of a high-capacity production scanner. Regardless of your document scanning needs, Falcon Transportable is intended to attack the most difficult and daunting workflow challenges wherever your on-site scanning business takes you.

## **UNMATCHED FLEXIBILITY AND ENHANCED FUNCTIONALITY**

Designed for easy maneuverability in and out of vehicles including minivans, Falcon Transportable can be set up and

running within a half hour of arrival at your customer's site.

Falcon Transportable allows operators to prep and scan documents at a faster rate than the prep process of most current workflows. This significantly reduces costs associated with preparing documents for scanning. In addition, Falcon Transportable offers four versatile feeder options: drop-feeder, packet feeder, high-capacity feeder, and a unique Rescan Feeder.

Falcon Transportable scans everything from single sheets in a wide range of sizes to multiple, large stacks of paper. The Falcon Transportable conveyor can hold more than 700 pages at any given time, allowing maximum throughput and uninterrupted processing. From thick paper to onion skin and fragile or damaged pieces, from envelopes and file folders to receipts,

to small forms and business cards – nearly any style or type of document can be scanned! With the optional external capture device and software, three dimensional objects can be imaged and placed directly into the electronic record.

## **IMPROVED EFFICIENCY AND INCREASED SECURITY**

Minimizing prep, paper handling, and other manual tasks not only improves efficiency, but also results in superior document integrity. Documents are handled once and converted to image. As documents are scanned, operators can also view images in real-time to ensure proper capture and identification. This reduces time-consuming and costly rescans later in the process.

## FEATURES & BENEFITS

### Designed for Scanning Operations on the Go

Falcon Transportable's frame is designed to easily fold and fit into a transport vehicle, and set up on site in approximately thirty minutes. Falcon Transportable is perfect for legal and medical scanning environments where documents simply cannot be removed from the premises.

### Versatile Feeder Capabilities

OPEX's specialized feeder provides a dynamic process that is proven to reduce prep and increase scanning accuracy. Patented drop-feed technology allows for efficient scanning directly from file folders, while intelligent packet sensing capabilities adjust track speed for optimal scanning throughput. The high-capacity feeder handles large stacks of mixed document types making the need for additional high-volume production scanners unnecessary. The Rescan Feeder is designed for fast and efficient rescans without disrupting the overall scanning process.

### Operator Friendly, Ergonomic Design

Falcon Transportable has a customizable work surface with options to fit the footprint of most scanning environments. The table provides adjustable height settings for maximum operator comfort. Falcon Transportable comes equipped with a 22 inch touch-screen monitor for enhanced viewing of scanned images and easy one-touch page-type classification.

### Prep-Reducing CertainScan™ 3.0 Software

OPEX's feature-rich CertainScan software is the perfect complement to Falcon Transportable providing auto-classification and the most intuitive way to visually classify documents as they are scanned. The versatility of this platform allows users to maximize the many features of their OPEX scanner and minimize the preparation of documents prior to scanning.

## Falcon Transportable Specifications:

Document Feeding	High-capacity auto feed Continuous drop feed Packet feed Rescan feed
Document Width	2.0"-12.25" (5.08 cm – 31.12 cm)
Document Length	3.5" - 25.50" (8.89 cm – 64.77 cm)
Scanning Speed	Up to 110 ppm / 220 ipm @ 300 dpi
In-line Recognition	OCR, OMR, barcodes, document type ID
Media Detection	Multifeed detection, height, length, skew and envelope detection
Document Separation	3 programmable output sort bins 1 programmable straight-path sort bin for extra thick and delicate items
Daily Duty Cycle	Unlimited
Maximum Dimensions (H x W x D)	69.72" x 86.38" x 31.98" (177.09 cm x 219.41 cm x 81.23 cm)
Bundled Software	CertainScan™ 3.0 64 bit host software, CertainScan Essentials™, CertainScan Edit™, OPEX Transform™, OPEX standard barcode package, Windows 7 64 bit
Additional Features	OPEX Provided CertainScan PC Flat-panel 22" touch-screen Packet ID Early envelope detect IDAssist™
Popular Optional Features	Audit trail printing (front and rear) Rear graphics printer (prints signature and Code 39 barcode) VRS* technology image enhancement Key Assist™ Reference ID MICR/MICR+ OPEX provided generic mount for external capture device Multi-page type IDAssist *VRS is a registered trademark of Kofax, Inc.
Available as	Falcon and FalconRED
Typical Applications	Secure legal and medical scanning environments, backfile conversion, archive, large legal firms, and record storage facilities
